Working with animals		Working in confined spaces	X		

Actions for all clinical new starters

*All EPP staff must have Occupational Health (OH) clearance prior to commencing work in the Trust. Please email OH scanned copies of your occupational blood results and immunisation records which will help prevent delay in your start date. If you do not have these email OH to arrange an appointment and bring your passport, as proof of identity, to your appointment.

All other clinical staff will be emailed by OH, at least one week prior to their start date, requesting copies of their occupational blood results and immunisation records. In order to avoid unnecessary delays please make every effort to obtain your records from your previous OH services or GP. If you have no such records email OH and a new starter appointment will be offered within your first two weeks; this appointment must be attended.

For all clinical staff a certificate will be sent to you and your manager confirming you have the clearance/protection required by the Dept. of Health to carry out your new role at Kingston Hospital.
