

Advert – band 3 Dietetic Support Worker with the Dietetic Prescribing Advisor team

Are you interested in working with patients in a healthcare environment to improve their nutritional health and overall wellbeing? If yes, we are looking for someone like you to support the work of our registered dietitians in our adult community team.

We are looking for a motivated individual who is organised, has good communication skills and is a team player. The work will involve supporting the Dietetic Prescribing Team to support good nutrition in care home and to ensure use of nutritional products on prescription is in line with ACBS criteria. You will be supported by the dietetic prescribing team lead and dietitians working in the team.

This role involves leading on the management of the referrals and waiting list and communicating to care homes. It will also involve completing dietetic reviews and speaking to the team leaders in the care home and give first line advice, under the support and direction of the dietitian. The consultations are predominantly by telephone; therefore the work can be completed both in the dietetic office or home working.

We are a diverse service and have an enthusiastic dietetic team which covers the whole of the county. We are keen to provide development opportunities for our staff and will work with you to progress your career journey. If you like this work there is the possibility of going on to train as a dietitian through the apprentice route. As a trust we proactively promote your wellbeing.

We are very accessible by rail and road so take a look at what we can offer. We have bases at Northampton General Hospital and Kettering General Hospital. Interested? Please contact monica.compton2@nhft.nhs.uk or phone 07901 008943 for more information and to discuss what your role could look like now and in the future!
