

Job overview

**Great Ormond Street Hospital for Children NHS Foundation Trust**

**Trust Fellow in Paediatric Immunology, Infectious Diseases & BMT**

**(Equiv. of ST4+)**

**12-Month Fixed-Term, Full Time**

**1/2 Posts beginning 4-Sep- 2024**

*40 basic hours plus an additional 'out of hours work' equating to a max. of 48 hours per week on average*

***Based in Immunology, ID and Bone Marrow Transplantation***

We are currently inviting applications for an exciting opportunity to gain or extend your clinical experience of Immunology, Infectious Diseases and Bone Marrow Transplantation in this unique and supportive environment within a busy children's hospital.

The post is suitable for someone who wishes to consolidate previous experience/training in Immunology, Infectious Diseases and/or Bone Marrow Transplantation, or for someone with previous middle-grade paediatric experience who has an interest in these areas. MRCPCH (or equivalent) is essential. The post-holders will be involved in the in-patient care of children affected by a wide range of primary immunodeficiency disorders and infectious diseases, and will also gain some experience of bone marrow transplantation, working as part of a larger team of middle grade doctors.

Applicants must be registered with the GMC with a Licence to Practice or eligible for registration.
